EDUCATION

Duke Kunshan University | 昆山杜克大学

May 2026 | Kunshan 昆山, CN

Dual Degree, Computation and Design

- GPA: 3.6/4.0; 1560/1600 SAT; Awarded Merit Scholarship (60% Tuition)
- Data Structures, Algorithms, Discrete Math, Databases, Stats, Modeling and Predicting, Probability, Computer Organization

Duke University | B.S. in Computer Science

2026 | Durham, NC

EXPERIENCE

BRIYA | Fullstack Developer IT Specialist

July - Aug 2025 | Washington, DC

May - Aug 2024 | Washington, DC

- Created a **MERN** stack classroom booking system supporting **5 campuses** and **100+ faculty**, including conflict-aware booking logic, drag-and-drop editing, and recurring events with multiple calendar views, fully responsive across desktop and mobile.
- Deployed backend infrastructure with REST APIs, Nginx, and SSL on Linode, achieving zero downtime since launch.
- Enrolled and configured **1000+** Chromebooks for student distribution, performing disk wipes and domain trust restorations.

DUKE UNIVERSITY | Data Automation Engineer

May - July 2025 | Durham, NC

- Engineered a Python-based data processing pipeline to automate mailing list segmentation for **10,000+ user records**.
- Developed PyQt desktop application to transform multi-event datasets into aggregated reports with venue-based filtering.
- Automated survey consolidation with Qualtrics workflows to centralize large-scale surveys into standardized spreadsheets.

VINTORY | Graphic Designer and Prompt Engineer

May - Sep 2023 | Remote

- Built a Midjourney prompt library to streamline generative design, trained ChatGPT to produce structured prompt arrays.
- Spearheaded the adoption of AI-based design automation. Created **30+** custom postcards and branded **100+** templates and landing pages for top vacation rental management firms, using Midjourney to generate stock photos.

PROJECTS

Ember Intelligence

Feb 2026 - Present

- Built and deployed a B2B SaaS for multi-tenant knowledge retrieval, improving agentic AI workflows across finance and consulting teams.
- Developed MCP server-driven integrations connecting multiple AI harnesses to enterprise sources including SharePoint and Harvest.
- Engineered a provider-agnostic Python ingestion pipeline with document chunk enrichment and Qdrant indexing for hybrid retrieval.
- Designed a stateful incremental sync architecture to track source changes, deleted content, and handle selective re-indexing.

RAG Fact-Checking Extension

July 2025 - March 2026

- Designed a Chrome extension in React with a Node.js/Express backend to verify highlighted claims in under **5 seconds**.
- Architected a **RAG** pipeline using **LangChain**, ChromaDB, and a locally hosted MiniLM embedding model.
- Implemented and benchmarked single-step agentic vs. deterministic two-step retrieval architectures, evaluating latency, retrieval accuracy, context leakage, and inducing misinformation through prompt injection.

FlightOps Database Design

Oct 2024 - Jan 2025

- Designed, implemented, and scraped data for a relational database in MySQL, with **10+ interrelated tables** for flight data.
- Engineered a web scraping pipeline with Playwright to query real-time flight data, bypassing API and rate limitations.
- Developed backend logic with CRUD functionality to optimize flight paths, manage assignments, and update crew data.
- Compiled databases of over **10,000** airports, **7000** aircraft, and **600** airlines to support large-scale flight analysis.

SKILLS

Languages: Python, TypeScript, JavaScript, HTML/CSS, SQL, R, Java, MIPS Assembly

Frameworks & Libraries: React, Node.js, FastAPI, Next.js, Tailwind, Vite

AI & Data: LangChain, LangGraph, MongoDB, ChromaDB, Qdrant, Cohere, Unstructured

Cloud & Infrastructure: Google Cloud, Azure, LiteLLM, Linode, Docker, Git

Design & Media: Adobe Creative Suite, WordPress, Maya, Unity

ADDITIONAL INFORMATION

Languages: English (native), Mandarin (intermediate), Spanish (beginner)

Interests: Digital painting, travel photography, piano, guitar, ultimate frisbee, soccer
